STUDY OUTLINE

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC. GENERAL SECURITIES PRINCIPAL QUALIFICATION EXAMINATION

The NASD General Securities Principal Qualification Examination (Test Series 24) is designed to test a candidate's knowledge of the rules and statutory provisions applicable to the management of a general securities broker/dealer. This study outline has been prepared to assist member firms in preparing candidates to sit for the examination. The outline is designed for use by course developers in the preparation of training material, for training directors in the development of lecture notes and seminar programs and for use by candidates themselves, both to structure their study and as a final review checklist prior to sitting for the examination. The General Securities Principal Qualification Examination and this study outline are composed of five general areas of supervision, which are listed below with the approximate percentage point value assigned to each area.

	General Area	Percentage Point Value
1.0	Supervision of Investment Banking Activities	20%
2.0	Supervision of Trading and Market-Making Activities	20%
3.0	Supervision of Brokerage Office Operations	22%
4.0	Sales Supervision, General Supervision of Employees, Regulatory Framework of NASD	26%
5.0	Compliance With Financial Responsibility Rules	12%

Detail on the content of each of these general areas of supervision is included in the text of the study outline which follows.

Structure of the Examination and Grading Procedures

The General Securities Principal Qualification Examination is composed of 125 multiple-choice questions covering all of the material in the following outline in accordance with the subject matter distribution shown above. A maximum of three hours testing time is allowed for candidates to complete the examination. The examination is graded on a 125 point system. Each multiple choice question is worth one

point. No credit is given for incorrect answers to these questions. The passing grade is equal to 70% of the total number of questions on the examination. Candidates will be required, therefore, to answer correctly 88 of the 125 questions on the General Securities Principal Qualification Examination in order to receive a passing grade. The results will identify the percentage performance of the candidate in each of the five general areas of the examination.

The examination is a closed book test and candidates will not be permitted to use any reference material during their testing session. Scratch paper will be provided to a candidate by the test administrator, but must be returned to the administrator at the end of the testing session. Electronic calculators may be used provided such devices have an independent power source, operate silently, no print mechanisms, and no alphabetical keys or programmable memory.

Questions used in the examination will be updated to reflect the most current interpretations of the rules and regulations on which they are based. Questions on new rules will be added to the pool of questions for this examination within a reasonable time period after their effective dates. Questions on rescinded rules will be promptly deleted from the pool of questions.

Below is a list of reference materials that may be used as a source-material starting point for course developers in preparing training programs. Much of the reference material overlaps topics covered in other references. It is, therefore, not necessary, to obtain each reference listed. In addition, non-member commercial training vendors offer packaged study courses specifically designed for this registration category. These vendors are often listed in local yellow page directories and advertise in securities industry periodicals.

Copies of this outline and registration applications may be obtained from NASD MediaSource or any of the NASD District Offices.

(301) 590-6578

Throughout the outline, New York Stock Exchange rules have been cross-referenced to the appropriate NASD and SEC rules. In instances where the rules differ, explanatory notes highlight the requirements of

each rule. The Exchange rules listed in Section 2.2 will be tested. However, the rules referenced in other parts of the outline are provided for information purposes only. Test questions on the examination will be asked in terms of NASD or SEC rules.

At the end of this outline there are five sample questions written in the various formats used in the Series 24 test questions. These samples do not reflect the difficulty level of the test questions or the subject matter distribution of the test itself. Their use is to familiarize candidates with the types of multiple choice question formats used in the Series 24.
